NOT A FAN

ABOUT ME

I graduated in 2005 with a BA in Multidisciplinary Studies and a certification in grades K-8. I taught in the Loudon County public school system for one year before deciding to start a family and stay home to raise my babies. I quickly became an active volunteer after enrolling my oldest son, Bart, into CCA for preschool. Two years later, in 2016, I was brought on as a math teacher for grades 4-7. I have taught 4th and 5th grade in a combined classroom for the last five years.

As an upper elementary teacher, my priorities are solidifying math facts, fostering a love for reading, learning by researching interesting topics, exposing students to animal care and gardening, and preparing them for middle school, all while in a Godly environment.

I am married, and we have two sons, ages 14 and 10. I enjoy gardening and taking care of my mini farm. We raise goats, chickens, turkeys, rabbits, and pigs. We also have several pets, including a dog, a cat, a turtle, a snake, and a bearded dragon that comes to school with me daily.
